software application

Muster

Social-oriented inventory tracking application

https://muster-94d83.firebaseapp.com/

– Implemented dragging functionality with Dragula that makes a query based on user action to have seamless communication with database

– Optimized UX by using firebase to create real-time response in trading and messaging

– Engineered user interface and user experiences using React, CSS Grid and Flexbox

– Integrated stripe functionality in previous product builds for payment processing

Brevity

Coding challenge platform based on speed and accuracy

hrbrevity.herokuapp.com

– Revitalized legacy code base in modularizing and adding features to improve efficiency and user experience

– Devised RESTful API to parse data and subsequently rendered data in user friendly form

– Constructed Mongo-backed test runner with Mocha and Ace Editor in order to run user input code

Bespinterest

Application for sharing and managing images on a personal board

https://github.com/limsohee1002/bespinterest

– Worked across the stack to ensure proper AJAX communication between React client and Express Server using Axios

– Implemented front-end routing with React framework using React Router to facilitate navigation and increasing maintainability

– Managed Git workflow and coordinated a four person team, which includes reviewing, accepting and denying pull requests

professional experience

Best Home Fashion

Graphic Designer

Closter, NJ · 2017

– Planned and executed website design on a weekly basis

– Constructed both images and videos in the form of banners, product launch videos and brochures

– Determined target audience, developed brand image & designed custom logos
